

DEARAIL

Print this guide on an A4 sheet and make sure that the print scale is correct by measuring the sample of 10 cm.

Now take a ring you already own that fits the desired finger and place it over the circles.

Your measure corresponds to the number of the circle that best fits inside the ring. The circle must be visible.

SECOND OPTION: If you don't have a way to print it, you can measure the diameter of your ring yourself by placing it on a ruler so that the millimetres are visible in the widest part of the ring.

Now compare these measurements with the ones under the circles to know your size.
